

## TURNS OLD KEY FOR LAST TIME

Doors Locked in Former Home of Y. M. C. A. and New One Opened.

## FLAGS FLY OVER BUILDING

Week of Ceremony and House Warming Starts With Prayer.

(From Monday's Advertiser.)

An impressive and inspiring scene was enacted on the corner of Alakea and Hotel streets yesterday afternoon between four and five o'clock, when the Stars and Stripes were lowered from the staff above the old Y. M. C. A. building and a large and new edition of Old Glory was hoisted to the top of the pole on the new home of the Young Men's Christian Association across the way. With the American flag there was also hoisted the standard of the association.

In the hall of the old Y. M. C. A. building there gathered some two hundred interested people, including numerous prominent and representative men. Governor Frear lent his presence to the ceremonies of passing from the old building to the new Y. M. C. A. structure, as did others of official position and dignity. On the streets were gathered a few hundred people who watched with interest the later act of hoisting the flag to the new building's staff. President R. H. Trent, of the association, presided at the meeting in the old hall, wherein, since 1882, there have been held so many important and advantageous meetings. After the Rev. Mr. Ebersole had invoked a blessing, praying for continued success in the new building, those assembled recited the twenty-third psalm, "The Lord is my Shepherd, I shall not want. He leadeth me into green pastures, beside the still waters."

## Work Accomplished.

Reminiscences of the old building and the work accomplished therein were indulged, how the first movement started in this "Paradise of the Pacific" away back in 1869; the additions to the building in 1893; the starting of the new building movement in 1908; the whirlwind campaign for funds of 1909, when nearly \$200,000 was raised in less than a week.

P. C. Jones, long prominently identified with the work of the Y. M. C. A., one of the first building committee which had charge of the old building now being vacated, performed the function of locking the door of the red brick edifice, retaining the key as a souvenir. Charles Atherton raised the Stars and Stripes on the new building across the street and Doctor Hand, the physical instructor, hoisted the pennant of the association. It was a pretty spectacle and an impressive scene and, with heads uncovered, those who had taken part in the farewell exercises in the old building, stood to watch the ceremony.

As the Stars and Stripes and the Y. M. C. A. flag took the breeze there arose from the group on the veranda and steps of the old building the singing of many voices in the hymn, "All Hail the Power of Jesus' Name!"

## Week's Ceremonies.

The week will be devoted, as previously announced at length, to the transfer of the headquarters of activity. At six o'clock this evening will be given the "press and pulpit" dinner. Tomorrow afternoon, between three-thirty and six o'clock, the new building will be open to boys. There will be a reception to members and subscribers from eight to ten o'clock in the evening.

The dedication of the new building will occur on Wednesday at eight o'clock. The building will be open to visitors and employed boys at seven-thirty o'clock of Thursday.

At eight o'clock in the evening of Friday there will be an exhibition of the physical department.

Saturday night belongs to the education department, there being a reception of the city educators at eight in the evening. The first men's meeting in Cooke Hall will be held at eight o'clock of Sunday next.

## Funds Not Adequate.

In the course of the construction of the new Y. M. C. A. building it was seen that the funds supplied were not going to be quite adequate for the demands, and the directors authorized the building committee to go ahead, feeling that if the money were not forthcoming, the association would have to borrow the small amount. The extra for which no money was in sight amounted to \$7500. Half of this has already been subscribed by a friend of the association, and it is hoped that the other \$3750 will be in the hands of the building committee before the building is dedicated on Wednesday night.

The executive officers who will start the work in the new building next week are: Paul Super, general secretary; E. H. Hand, physical director; A. E. Larimer, educational director; C. F. Loomis, boys' work director; A. T. Wisdom, manager of social privileges; and George Chamberlin and Floyd H. Edmunds, office secretaries.

The board of trustees as at present constituted are B. H. Trent, president; C. H. Cooke, B. F. Dillingham, P. J. Lowrey and P. C. Jones.

The board of directors is made up of the following: H. H. Trent, president; W. G. Hall, vice president; F. C. Atherton, treasurer; O. R. Waterhouse, recording secretary; W. A. Love, B. A. Cooke, C. H. Atherton, Ed. Tuma, H. G. Dillingham, P. D. Lowrey, Robert Anderson, H. B. Anderson, Alexander

## AN EXPERT ON BITULITHIC IS EN ROUTE HERE

Workmen are engaged in tearing up Queen street and the material is being dumped into the extension of Bishop street which is to be paved later on. J. A. Gilman, head of the bitulithic company, expected to get started on the laying of the bitulithic material early in the week, but the expert whom he called for, would not get passage on a steamer picked out for him, but he will be here the early part of next week.

He will personally supervise the laying of the pavement, while Mr. L'Honnemieux will look after the preparing of the material at the company's plant in Iwilei.

Lindsay Jr., W. T. Pope and R. J. Pratt.

## History of Local Branch.

The Honolulu Y. M. C. A. was organized April 30, 1869, with Judge Dole as first president.

Finally a building committee, composed of P. C. Jones, C. M. Cooke, William W. Hall, Dr. J. M. Whitney and Capt. Isiah Gray, was appointed to secure funds to build a permanent home. In this work P. C. Jones was the most active of the committee. The first home of the Y. M. C. A. was erected at the corner of Hotel and Alakea streets and was dedicated in April, 1883, just fifteen years after the original organization of the local association.

With the arrival of Paul Super, general secretary of the association, and Dr. E. H. Hand, physical director, in the fall of 1906, the movement for the new building began.

The campaign resulted in securing one hundred and forty-four thousand dollars in a six days' campaign, and, as this was deemed at the time sufficient, canvassing ceased. The committee in charge of this most successful whirlwind campaign consisted of George R. Carter, R. H. Trent, J. P. Cooke, F. C. Atherton and George F. Davies.

The following tabulation of the larger donations is of interest:

One of (C. M. Cooke).....	\$50,000
Four of .....	10,000
Seven of .....	5,000
One of .....	3,000
Two of .....	2,500
One of .....	2,000
Ten of .....	1,000

The building committee of the association, consisting of T. C. Davies, A. G. Gentry, F. J. Lowrey, W. G. Hall and R. A. Cooke, now had in hand from over one thousand subscriptions the sum of \$194,000 and what could be derived from the sale of the old building. Ground for the new building, of which Ripley & Reynolds were the architects, and the Pacific Engineering Company were the contractors, was broken by Governor Frear October 26, 1910.

## The New Headquarters.

The lot on which the new building stands has a frontage of 145 feet on Hotel street, 212 on Alakea, and about 175 feet on Adams lane. It is of reinforced concrete and steel frame construction, built around the three sides of a central court, which gives splendid light to every room in the building, and is of three stories and a basement, with the opportunity in the future of having a garden on the roof.

The main entrance is at the corner of Alakea and Hotel streets, approached by a low, broad, oval stairway leading from the sidewalk to the main floor. In front of this entrance are the secretary's counters. To the right the music room, the billiard room, the lani, and the cafe. To the left, the game room for chess and checkers, and a corridor leading to a small auditorium called Cooke Hall, seating about a hundred people.

Another entrance is on Adams lane and opens into the boys' department, which is in the second story, occupying the whole of the Hotel street wing. The basement is to be used for shops, laboratories, lavatories, locker rooms and bowling alleys.

The gymnasium and other athletic features of the new building are modern and complete. A feature is a running track overhead. Twenty-six lanes go to a mile.

The gymnasium proper is equipped with a national wrestling machine, arm machine, wrist machine, two hydraulic rowing machine, adjustable horizontal bars, two standard adjustable horse, two standard adjustable parallel bars, a German vaulting block, climbing ropes for contest work, trapeze, traveling and flying rings, adjustable for senior and junior work, dumbbells and clubs, steel wands, Roman ladders for pyramid work, and triplex pulley weights for setting up exercises.

The games room is 54x93 feet and is marked for indoor baseball, basketball and volleyball.

The wrestling and boxing room is in the basement. The wrestling section of the room is equipped with heavy-weight dumb-bells.

There are two handball courts, one above the other, each having a visitors' gallery.

Bowling will be made a feature of the athletic department of the institution. Three maple alleys have been installed.

The institution is furnished with three Brunswick-Balke-Collender pool tables.

The physical department will remain under the supervision of Doctor Hand, assisted by specialists. The billiard tables and bowling alleys will be in charge of Expert Wisdom.

The boys' department is one of the handiest in the country. The boys have practically a building of their own.

The entrance to the boys' department is on Adams lane.

The cafe will be run on the cafeteria plan. The charges will be very moderate and the cafe will be open to members and their friends.

The dormitory on the top floor contains twenty-four rooms, accommodating thirty-three men.

The room for games, tennis, indoor baseball and basketball has the appearance of a large high-ceilinged gymnasium.

In the construction of this building, the contracting firm has used only local men and the building is the result of citizen labor only.

## COTTON GROWERS NOT DISCOURAGED

Say Future is Bright for the Industry Here—To Fight Boll Worm.

Published statements to the effect that the cotton growers of Oahu are discouraged over the prospects and are in any way inclined to dub their experiments as failures because of the presence of the cotton worm, are taken exception to very decidedly by some of them. So far are they from being discouraged that they are intending largely to increase their acreage in cotton.

"The presence of the cotton worm, while it means trouble for us, undoubtedly, does not mean extermination," says a representative of the Kaneohe Cotton Company. "In the first place, the cotton worm is not the boll weevil, which so many seem to think. The worm is infinitely less destructive than the weevil pest. The latter attacks the flower, while the worm simply attacks the seed after it has formed, the only effect on the lint being to discolor it and reduce its grade."

"We are now attempting to create a winter season for our cotton, cutting the growth back and making a period during which the worm has nothing to feed upon. This should hold the worm in check until we can get a parasite. At least one parasite for the cotton worm is known, but Doctor Wilcox tells us that it is not particularly effective."

"But the worm is not going to put us out of business, or anything like it. We have received so much encouragement that we propose keeping at it and going ahead. The samples we have submitted to mainland experts have brought us glowing reports. The length of the Hawaiian staple led some of those to whom samples were submitted to recommend that we ship our entire output to Brussels, where the cotton would be in great demand among the lace-makers. Another result of our samples has been to attract the attention of the manufacturers of automobile tires, users of the best grade of cotton. Some of the manufacturers are corresponding with us."

"So you see there is no reason in the world why we should feel in any wise discouraged. The general cotton outlook now is good. The mainland had an extra large crop, but the Egyptian crop was a failure, so the price holds up."

"We will raise the money to send for a parasite for the cotton worm, all right, and in the meanwhile we will go right ahead. The future for cotton for Hawaii is bright."

## NO ONE CARES FOR TRUANT CHILDREN

Supervising Principals Report a General Neglect of the Runaways.

Truant officers formed the subjects of a little plain speaking at Saturday's meeting of supervising principals.

On this island, Mr. Pope stated, the matter had been brought before the supervisors, who had taken "careful note" of the matter, and that was invariably the last heard of it. The department could not do anything towards abating the truant nuisance, for it had no funds with which to pay a special officer.

This lack of interest seemed to be general. Others told how the sheriff's deputy had this matter in hand, and he either took no notice of it, or dispatched policemen who utterly disregarded his instructions. There was no remedy for this, it was pointed out, for the deputy sheriff could not be removed from his office.

Mr. Pope thought it only fair to mention that on this island it had been useless doing anything in the matter, for the schools had been so crowded that the children could not have been accommodated anyway. This will be looked into before the next legislative meets, with a view to submitting a bill to that body for the appointing of an officer to look after truant.

The fire at the plant of the Hercules Oil Refining Company at Vernon, near Los Angeles, which burned for twenty-four hours, has been brought under control. The loss is estimated at \$150,000.

## "JOHNNY" MARTIN FINISHES TENTH YEAR AS LEADER OF THE PRISON SERVICES

The usual Sunday services held at the territorial prison were in the nature of anniversary observances, for they marked the completion of the tenth year of the continuous service of John M. Martin as head of the Y. M. C. A.'s prison committee, during which time he has conducted all Sunday meetings for the unfortunate there.

A quartet of Hawaiian girls from the Kaula Home, Ruth Hahenakahi, Mabel Naeue, Ruth Mitchell and Dorothy Mitchell, rendered several songs and a double quartet of prisoners also assisted on the musical program of the day. Mr. Cooper, who conducts the Sunday evening bible class meetings at Kaula, Mission, gave a short address in which he referred highly to the work of Mr. Martin, saying that there were better looking men and gentler spirits than his subject, but that few had so many friends as he had.

## MANY TO HONOR PERCY HUNTER

Two Hundred Accept Invitations to Luncheon for Him on Wednesday.

The luncheon to be given as a welcome to Hawaii to Percy Hunter, honorary vice-president of the Honolulu Around-the-Pacific Club, will be held at the University Club Wednesday. Governor Frear, honorary president of the organization, will preside and two hundred others, representatives of every island, State, Commonwealth and Empire of the Pacific, will be present. So far more than a hundred and twenty-five reservations have been made for seats, B. Sheela and the Japanese leading with a request for twenty-five places for themselves and their prominent haole friends, who have lived in or visited Japan. California will have a table for herself, as will New Zealand, Australia, the Pacific Northwest, China, Siberia and the South Sea Islands.

Mr. Hunter will be notified by wireless of the time of the luncheon and requested to invite a dozen of his fellow passengers on the Makura as guests at the lunch. An elaborate printed menu and souvenir is being prepared, presenting not only the objects of the club and the toasts to which each country, State and island will respond, but the names of all present and the portion of the Pacific they know and represent.

The object of the gathering is to take the first steps toward formally inviting every government of the Pacific to join hands in the expense of establishing joint tourist and exhibition bureaus in New York and perhaps other large American cities; to invite co-operation in the plan of maintaining a Pan-Pacific exhibition train en route through the United States, and to further the project of the round-the-Pacific annual cruise. Hunter will probably have reports to make on the rest of each of these projects, as he was to investigate them on the mainland for the club. It is probable that the club will also receive an invitation from its honorary vice-president to send a Hawaiian display for permanent exhibition in the Australian building in London.

The demand for invitations to the welcome lunch to Mr. Hunter have been so great that it is necessary to limit the number of representatives of each State and country. The gathering will be the most cosmopolitan and representative Pacific gathering ever got together, the leading men of each country of the great ocean living in Hawaii being booked to be present.

## Y. W. C. A. READY FOR THE YEAR'S WORK

Many Classes Planned to Cover All Subjects—Will Be Well Led.

The Young Women's Christian Association is preparing for an energetic year and its plans, just announced, include many features. A larger membership is being solicited in order that the classes planned may be the better supported.

Shakespeare study classes will meet every alternate Thursday at three o'clock in the afternoon at the offices in the Boston block, the first meeting being planned for the nineteenth of this month. There will also be travel study classes, which also meet twice a month under competent leadership. Every alternate Tuesday has been selected and the first meeting will take place at the Homestead on King street at half-past seven in the evening. The first meeting will be held tomorrow.

A class in first aid to the injured, to be directed and taught by Dr. W. C. Hobbs, will meet every Tuesday on the ground floor of the Kilauea Art League building, on the corner of Miller and Beretania avenues, at half-past seven in the evening.

There will also be a Bible class to be led by Mrs. W. C. Weedon, but the date for this has not been definitely set, although it is probable that it will be on Friday evenings at the Homestead.

Evening classes in stenography, typewriting and bookkeeping will be organized as soon as enough pupils are enrolled to make it possible.

## LOSES BRIDE, WOULD SUICIDE, IN JAIL BESIDE!

(From Monday's Advertiser.)

Ah Fong he would a-would go. Ah Fong is now in jail because his gay advances made his fiancée turn pale. Ah Fong was too impetuous. He wooed Miss Anne Moe, a student in the Normal School. (Her uncle is Mahoe.) His glad rage failed to turn the trick. She scorned his heartfelt speech; was bound that little children who would still learn how to teach. She wouldn't be his wife, said she, but an educating son. Ah Fong he knashed his pearly teeth and went and bought a gun.

"I'll shoot you and your mother, too, and then I'll suicide, if you refuse to marry me," her bashful lover cried. She told her uncle; he told Rose. Ah Fong was pinched on sight. Ah Fong'll get about two months to learn to do it right.

## PRACTICAL WORK FOR NEW SILK INDUSTRY

Philippine Government Issues a Manual of Information on Subject.

A Manual of Philippine Silk Culture, by Charles S. Banks, recently published by the bureau of science of the government of the Philippine Islands, Manila, is based upon six years of experimental work with the mulberry and other races of silkworms.

The mulberry silkworm, a normally monovoltine species, has been caused to produce eight to nine generations a year of healthy, robust caterpillars from a stock imported from Ceylon where it had normally produced six to seven generations.

Among other things the quality and market value of Philippine silk are compared with that of European and Japanese silks and it is shown that silk produced in the Philippines is little, if any, inferior to the best grades of silk grown elsewhere, with the advantage of eight to nine crops a year in its favor.

Hybridization of Bengal-Ceylon polyvoltine silkworms which produce yellow cocoons and Japanese monovoltine silkworms which produce white ones, resulted in the Philippines, in two races of silkworms producing white polyvoltine cocoons.

One industrial school, located at Batangas, Ilocos Norte, has already taken up silk culture with its Filipino students with excellent success, and it is planned to start other centers throughout the islands. At present there is no commercial production of silk in the Philippines, but Mr. Banks' work demonstrates that a large new industry is feasible.

Although dealing in particular with experimental silk culture in the Philippine Islands this manual will be of great interest and assistance to sericulturists in all countries.

The manual contains minute directions covering the care and propagation of both mulberry and eri silkworms, diagrams of silk houses and reels and is copiously illustrated.

## JAPANESE BABY DROWNS IN A SHALLOW AUWAI

Three sudden deaths occurring late Saturday night and early Sunday morning kept the autopsy surgeon busy yesterday, but as all except one were from natural causes the coroner was spared.

That one was the death of little Sadao Tarutani, who was drowned in a shallow auwai Saturday. She was the year-old daughter of T. Tarutani of Iwilei. She had been playing with several other girls, her mother having gone for water. According to what Deputy Sheriff Rose could learn of the accident she opened the door of a house used for cooking and upon going inside, where it was dark, stumbled and fell in the auwai. No inquest is considered necessary.

Kawai Hilo was the second to die suddenly Saturday. Hilo was also a resident of Iwilei and had been sick for three months or more. His condition when found indicated tuberculosis. The autopsy was held yesterday.

The third death reported to the police was that of Mrs. Henry Foster, who dropped dead in the rear of her home at Desha Lane and King street, yesterday morning at one o'clock. She had left the house for a moment with a companion and suddenly fell in a faint, blood issuing from her mouth. Help was called and she was carried into the house, dying almost immediately afterwards. The autopsy yesterday proved it to be from natural causes.

## ITALY ABOLISHES SLAVERY IN TRIPOLI

Issues Proclamation, Prepares for Action—Captures Turkish City.

## NAVAL BATTLE IS REPORTED

United States Ambassador Is Reported Urging Russia to Intervene.

\*\*\*\*\*

One of the immediate results of the victory of the Italians at Tripoli has been a proclamation, issued yesterday, abolishing slavery in that country, the last bordering on the Mediterranean where slavery has been legally recognized. Such a result makes the war worth while.

The Greek government has closed the Corinth canal to the uses of either the Turks or the Italians during the war. From London comes another report that two Turkish destroyers have been sunk and 300 lives lost. There are supposed to be only nine destroyers in the Turkish navy.

United States Ambassador Rockhill, at the Russian court, is said to be urging Russia to intervene in behalf of peace between Italy and Turkey and that Turkey is willing to make reasonable concessions to secure peace.

\*\*\*\*\*

Slavery to Be Suppressed.

ROME, Italy, October 9.—Now that Tripoli has been captured, and an aggressive campaign prepared for, a proclamation has been issued from Tripoli suppressing slavery in that country under Italian rule.

The Italian squadron of warships has bombarded Tobruk, a Turkish city, and have landed marines to take possession. The casualties were not heavy.

Urging Russia to Act.

LONDON, October 9.—William W. Rockhill, United States ambassador to Russia, is said to be urging the Russian government to take action in behalf of peace and to join with Turkey in a renewed request for intervention. It is announced that in connection with peace proposals Turkey has signified her willingness to make reasonable concessions to bring the war with Italy to an end.

More Destroyers Sunk.

The report of another engagement between Italian and Turkish warships has been received here, with the addition that two Turkish torpedo boat destroyers have been sunk and that 300 lives were lost, off San Giovanni Di Medua.

Canal Closed to Both.

ATHENS, Greece, October 9.—The government has issued notice that the Corinth canal, across the isthmus of that name, has been closed to the use of either Italian or Turkish ships of war during the progress of hostilities.

## PRESIDENT'S AUTO RESCUED FROM MUD-HOLE BY RANGERS

TACOMA, Washington, October 9.—President Taft yesterday made a trip by automobile to the glacier fields of Mount Tacoma and reached an altitude of six thousand feet.

During his trip the automobile became firmly stuck in a mudhole, from which it was finally rescued by forest rangers, who hauled it out with the aid of their horses and lariats.

The President declares that he enjoyed the experience and the trip immensely. Today he will speak at Bellingham, Mt. Vernon, Everett and Seattle, Washington.

## WINNING BALLOON WILL COMPETE IN GERMANY

KANSAS CITY, October 9.—The balloon Berlin, which won the race for the Bennett trophy with a voyage of 463 miles to its credit, last week, will be sent to Germany in 1912 to take part in the great international balloon race, which starts next spring.

## WELL KNOWN MAN KILLED BY A FALL

SANTA ROSA, California, October 9.—Peter C. Hunt, one of the best known men in this State, president of the Italian-Swiss Colony and a bank director in this city, was killed yesterday by being thrown from his buggy.

Mr. Hunt was out driving with a sister-in-law, when his horse was startled suddenly, throwing Mr. Hunt to the ground and fracturing his skull.

## PANIC AMONG PASSENGERS.

SAN FRANCISCO, October 9.—The steamer City of Panama, damaged in a storm, during which the passengers were panic-stricken, arrived here today.

## WORTH TWENTY TIMES ITS COST.

One bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy goes a long way toward relieving suffering humanity. It is better than any doctor's prescription, and worth twenty times its cost in case of diarrhoea, cramp, colic or dysentery, which are liable to come on suddenly at this season of the year. For sale by all dealers. Bennett, Smith & Co., Ltd., agents for Hawaii.
